

# 2012 Idaho Environmental Education Conference

## “Natural Partners – Environmental Education and Green STEM”

Friday & Saturday, March 2 - 3  
Owyhee Plaza Hotel  
Boise, Idaho

### Showcase of Student Work

We are looking for students and teachers to display samples of their outstanding work at the 12<sup>th</sup> Annual Idaho Environmental Education Conference, hosted by the Idaho Environmental Education Association (IdEEEA). The Conference, the premier event in our state for formal and non-formal practitioners of environmental education (EE), attracts representatives from elementary and secondary schools around Idaho, universities, tribes, business & industry, non-profit organizations as well as local, state, and federal agencies.

This conference will serve as both a forum for statewide planning and networking, and a celebration of accomplishments. It is also the annual meeting of the Idaho Environmental Education Association.

We invite you to share your students' outstanding accomplishments and successful projects from any grade level and subject area, including art, poetry, and science fair type projects. All displays should tie into the conference theme in some way. Conference participants particularly enjoy talking with students about their work, so we encourage students to attend. However, we will also accept displays of student work. Each project will be displayed on a 6' skirted table.

The Showcase of Student Work will kick off Friday night's EE Celebration. After the Showcase concludes, you and your students are cordially invited to enjoy the rest of the EE Celebration with the nationally acclaimed Missoula Children's Theater performance of *The Secret Garden*.

### **EE Celebration! Friday Night, March 2<sup>th</sup>**

#### **6:00 – 7:00 Showcase of Student Work**

5:00 – Set-up begins in a specially designated room (TBD)
